

HYDROPOWER AFRICA

Company Announcement: Hydropower Africa: Go small or go home

6th July 2011

Attached please find a press release on: Small hydropower projects have proven to be major contributors to the electrification of developing countries and Sub Saharan Africa's small hydro potential still remains largely untapped, says Nicolaas Loretz, project director of Hydropower Africa that is taking place from 19-23 September in Johannesburg. During what is Africa's largest hydropower event, delegates will have the unique opportunity to visit some of Africa's top hydropower projects, including DRC's Inga, Zambia's Kafue Gorge and South Africa's most scenic small hydropower schemes in the Eastern Cape province
